## BigShot Sandwich Stacks for All Brands of Dies

Rotate your cutting pads after each use to get the most use out of them.

<p><b>Premium Crease Pad</b> *option A</p>	<p>Standard Cutting Pad            Originals or Bigz or Bigz XL die blade side up * Position the Die with the Crease rule Perpendicular to the rollers            Cardstock            Premium Crease Pad            Roll through Big Shot</p>
--	--

<p><b>Premium Crease Pad</b> * option B            If the crease rule cuts through the paper try this sandwich</p>	<p>Standard Cutting Pad            Originals or Bigz or Bigz XL die blade side up *Position the Die with the Crease Rule Parallel to the rollers              Premium Crease Pad            Roll through Big Shot</p>
--	---

\* Many times just turning the die sideways will work. Just keep experimenting until you find the fit that works with your machine.

<p><b>Premium Crease Pad</b> * option C            If the crease line is ok but the blade fails to cut out the surrounding shape completely, add one clear shim beneath the die. Add both shims if needed</p>	<p>Standard Cutting Pad            Clear Shim * There are 2 pieces of Shim start with one first. You can add both if the sandwich is not thick enough.              Originals or Bigz or Bigz XL die blade side up            Cardstock            Premium Crease Pad            Roll through Big Shot</p>
